Hi,
there are multiple declarations for several lines in case of X11 and MAC.
A possible workaround could be, if you just simply add an #ifdef block to CtrlCore/CtrlCore.h
around line 664-667:

```
#ifndef GUIPLATFORM_CTRL_DECLS_INCLUDE
static int    WndCaretTime;
static bool   WndCaretVisible;

static void   AnimateCaret();
#endif
```
