Test case:

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
GUI_APP_MAIN
```

```
{
```

```
    TopWindow win;
```

```
    ArrayCtrl arr;
```

```
    arr.AddColumn("");
```

```
    for(int i = 0; i < 10; i++){
```

```
        arr.Add(i);
```

```
        arr.ShowLine(i, i%2);
```

```
}
```

```
    win.Add(arr.SizePos());
```

```
    win.Run();
```

```
}
```

then use keyboard arros in order to change the cursor.

patch:

replace

```
int ArrayCtrl::FindEnabled(int i, int dir)
{
    ASSERT(dir == -1 || dir == 1);
    while(i >= 0 && i < GetCount()) {
        if(IsLineEnabled(i))
            return i;
        i += dir;
    }
    return -1;
}
```

with:

```
int ArrayCtrl::FindEnabled(int i, int dir)
{
    ASSERT(dir == -1 || dir == 1);
    while(i >= 0 && i < GetCount()) {
        if(IsLineEnabled(i) && IsLineVisible(i))
            return i;
        i += dir;
    }
    return -1;
}
```
