Hello Mirek,

It didn't work but I've got a more detailed error -instead of plain nullptr- by using clang_parseTranslationUnit2() function, which returns an enum, defined in CxxErrorCode.h):

```
/**  
 * An AST deserialization error has occurred.  
 */  
CXError_ASTReadError = 4
```

I'll dig deeper, but if this gives you any hints, please let me know.

Best regards,
Oblivion
