Mountacir wrote on Mon, 13 February 2023 21:08Hi,

I made some modification to TheIde's StatusBar to reduce the crowded TitleBar and give a proper place for that error icon "StatusImage".

Your opinions?

I have status bar disabled to gain one more line of code that I can see....

LCDs are pretty wide last 10 years, so it makes more sense to try to put everything in single line in top.

That said, some of indicator moves you suggest make sense, I will consider these.
