Hi,

Trying to check if an image has DPI using Image::GetDPI() but it does not return Size(0, 0) if it doesn't have it, while ImageBuffer::GetDPI() does.

```
FileSelNative fs;  
fs.Type("png", "*.png;*.png");  
if(!fs.ExecuteOpen()) return;
```

```
Image image = StreamRaster::LoadFileAny(~fs);  
DUMP(image.GetDPI());
```

Thanks
