Subject: Choose valid characters for EditString/EditField

Hello, I am trying to make it so that I can create an EditString box that only will allow 0-9 and a-f or A-F values, but I can not find any description or option to make it that way. Any advice is appreciated.

Also if there is any way to make the format similar to "xx xx xx xx" automatically including the spaces I would like to do that, but again I could not find anything similar
