Subject: Re: (RESOLVED) Line drawn across Null values
Posted by koldo on Sun, 19 Mar 2023 11:43:27 GMT

I am not totally sure about the best behaviour. If you run ScatterDraw_demo_cl, you will get from this vector

s1 = {{1,14}, {2,65}, {3,29}, {Null,Null}, {5,40}, {6,50}, {7,Null}, {8,25}, {9,10}};
this plot

If x == y == Null, plot line jumps, but if just y == Null, a hole is created.

What would be the best behaviour?
