Subject: Re: Snapshot 20060116 released
Posted by mirek on Mon, 16 Jan 2006 19:39:44 GMT

p.s.:

* Do not forget to supply "Size optimization flags" to your build method, otherwise your code will likely be unoptimized

* Adding new features to build process means that (after app. 2 years) format of .upp files is upgraded. In other words, recompile TheIDE now to be able to compile next snapshots (when we will start using new features).
