There is an issue with FileSel with the current version. I can select a file, e.g. "datafile.csv", but the returned result is "datafile.csv.csv". Sometimes FileSel complains it cannot find the file that was picked up from the list:

```
FileSel fs;
fs.Multi();
fs.Type(t_("All supported formats"), "*.csv; *.CSV; *.txt; *.TXT");
fs.Type(t_("Comma separated values file"), "*.csv; *.CSV");
fs.Type(t_("Text file"), "*.txt; *.TXT");

if(fs.ExecuteOpen(t_("Import data file"))){
```

Best regards,

Tom

Remove ';\n

```
fs.Type(t_("All supported formats"), "*.csv *.CSV *.txt *.TXT");
fs.Type(t_("Comma separated values file"), "*.csv *.CSV");
fs.Type(t_("Text file"), "*.txt; *.TXT");
```

Thanks Mirek!

For some unknown reason I never knew there was no need for this semicolon.

Best regards,

Tom
