Klugier wrote on Sun, 21 May 2023 10:53Hello Mirek,

I found two issues

1) the first one is related to next/back stack for TheIDE build in help. It means that when you click on some entry for example "Assist++" you can not back to initial help menu. There are also problems with table of contents, it doesn't work in that view.

Also, when you open help for the first time after launching TheIDE it has back entry. It shouldn't be there and the stack should be empty.

Please test you, I believe you should find all mentioned issues pretty quickly.

Hopefully fixed, can you test?
