Hello Mirek,

Thank you, the problem with ordinary number keys is fixed.

However, I have also noticed that while registering NUMPAD keys in the keys dialog is possible, the apps can neither store nor restore them.

E.g. "Num0" to "Num9" are represented in the dialog, and can be used, but they can't be re/stored.

Is it possible to fix (or implement) them too?

Best regards,  
Oblivion
