Hi,

This works here for both light and dark themes:

```
s.topitemtext[2] = GetInkColor();
Over(m, topitem);
if(Diff(AvgColor(m), s.topitemtext[2]) < 100) {
    //s.topitem[2] = SColorHighlight(); // <<< Commenting this out helps!
    s.topitemtext[2] = SColorHighlightText();
}
}
```

Best regards,

Tom
