Hello mirek,

    I think i found the reason.
    In the CtrLib/Button.cpp Option& Option::Set(int b) function.
    if the code is: option = IsNull(b) ? Null : (bool)b; then the option can't assign a Null.
    but when changed to : IsNull(b) ? (option = Null) : (option = (bool)b); the option can assigned
to Null.
