Test case:

with this schema:

```
TABLE_(MY_TABLE)
INT_ (ID) PRIMARY_KEY
BOOL_ (IS_OK)
END_TABLE
```

this code:

```
SqlStatement s = Select(ID).From(MY_TABLE).WHERE(IS_OK == true);
LOG(s.Get(PGSQL));
```

print :

```
select ID from MY_TABLE where IS_OK = 1
```

PostgreSQL does not accept this sql statement.

the correct one is:

```
select ID from MY_TABLE where IS_OK = '1'
```
