Running this statement :

```
select TESTPARTNER_ID, TESTPARTNER_NAME, TESTPARTNER_ADDRESS, IS_OK from  
TESTPARTNER where IS_OK = 1 order by TESTPARTNER_NAME
```

in postgresql Sql console, print the same error message.

the correct statement is:

```
select TESTPARTNER_ID, TESTPARTNER_NAME, TESTPARTNER_ADDRESS, IS_OK from  
TESTPARTNER where IS_OK = '1' order by TESTPARTNER_NAME
```

where IS_OK = '1'

instead of

where IS_OK = 1
