I installed Ubuntu 22.04 Jammy Jellyfish (x86-64) for refresh installation foru day before.

So, i had "fatal error: 'typeinfo' file not found" message when i installing U++

Than, i searched typeinfo file on system, and there wasn't typeinfo file at /usr/include/c++/12 directory

I saw Tom1's (Senior Contributor)

`sudo apt-get install libstdc++-12-dev`

I installed, and everythink is ok now.
