This is a U++ program (version 0.0.1 alpha) released for testing and comments.

Features implemented
1. Splash screen
2. About dialog
3. Menu and popup menu
4 Toolbar
5. Status bar
6. Options dialog
7. Help (using Topic++)
8. Editors dialog (only shows DocEdit and LineEdit)
9. use of .rc file to embed program icon and version info.

This program is meant as a simple template program which I will use to explore the various aspects of U++.

I'm still new to U++ so I would appreciate any ideas or suggestions on this simple template. I want to get it right so that later I will write an article that explains how this program works.

Thanks in advance
Yeoh
