This is a U++ program (version 0.0.1 alpha) released for testing and comments.

Features implemented

1. Splash screen
2. About dialog
3. Menu and popup menu
4. Toolbar
5. Status bar
6. Options dialog
7. Help (using Topic++)
8. Editors dialog (only shows DocEdit and LineEdit)
9. use of .rc file to embed program icon and version info.

This program is meant as a simple template program which I will use to explore the various aspects of U++.

I'm still new to U++ so I would appreciate any ideas or suggestions on this simple template. I want to get it right so that later I will write an article that explains how this program works.

Thanks in advance

Yeoh
