Subject: Problem with SetTimeCallback in TrayIcon

Hi!

I have done a 'Trayicon-Application' and want to use a SetTimeCallback, but I'm getting an error during compiling the application.

C:/UPP_610/uppsrc/CtrlCore/CtrlCore.h:963: error: `void Ctrl::SetTimeCallback(int, Callback, int)' is inacces
sible

I thought TrayIcon is inherited from Ctrl, so why I cannot access SetTimeCallback? If I use the 'Class Browser' I can find SetTimeCallback in TrayIcon class.

Anything I did wrong?

Thanks for any tips or help.
