Quote:Oblivion,

It looks like Mirek really squashed it this time with his latest bugfix. I've been running it for several days now without a single issue but it would be nice to have a second confirmation when you have time.

Sorry, I'm a bit late.
I've been continuously running the patched TheIDE since last week (compiling huge apps), and I think at this point it is safe to say this annoying and nasty bug is gone (on Linux).

Thanks and well done, Mirek!

Best regards,
Oblivion
