Mirek,

Operating System: Arch Linux

KDE Plasma Version: 5.27.8

KDE Frameworks Version: 5.110.0

Qt Version: 5.15.10

Kernel Version: 6.5.3-arch1-1 (64-bit)

Graphics Platform: Wayland

Processors: 8 × Intel® Xeon® CPU E3-1240 V2 @ 3.40GHz

Memory: 15.6 GiB of RAM

Graphics Processor: NVIDIA GeForce GTX 1060 6GB/PCIe/SSE2

Manufacturer: Dell Inc.

Product Name: Precision T1650

System Version: 01

If it works with Wayland for you and you're not using an nvidia card then I'd have no problem chalking it up to nvidia driver issues. Like I said, no problems on X11.
