Klugier wrote on Sun, 22 October 2023 19:47Hello jjacksonRIAB,

One small think. Please replace Ultimate++ with U++ in repo description and inside README.md. Ultimate++ has been deprecated and should no longer be used in context of our framework.

BTW, I am waiting for the stable version with proper error handling. Once done, don't forget to ping me for adding this package to UppHub.

Thanks,
Klugier

Done and will do. :d
