Thank you Upbolo

Unfortunately, the stable version of Eigen, 3.4, is 2.5 years old, and since then until now important features have been added.

In addition, I don't have a computer of your type at my disposal for testing.

I could experiment with changes, but I'd be exhausting your patience by beating around the bush. I don't feel like consulting the Eigen Forum either, because I don't have the equipment to do a simple error test to be able to show them.
