Hi Klugier,

Sorry about the late answer!
I tried to build the latest nightly (17150) on Ventura, but it failed, unfortunately.

(date '+#define bmYEAR   %y%n#define bmMONTH   %m%n#define bmDAY   %d%n#define
bmHOUR   %H%n#define bmMINUTE %M%n#define bmSECOND %S%n#define bmTIME
Time(%y, %m, %d, %H, %M, %S)' | sed 's| 0\([[:digit:]]\)| \1|g' && \
 echo '#define bmMACHINE "'`hostname`'"' && \
 echo '#define bmUSER   "'`whoami`'"') > ".cache/upp.out//build_info.h"
make: *** No rule to make target `uppsrc/umk/Console.cpp', needed by
`.cache/upp.out/umk/GCC-Gcc-Linux-Main-Nomm-Posix-Shared/Console.o'. Stop.
make: *** Waiting for unfinished jobs....
./umk ./uppsrc ide CLANG -brs ./theide
./install: line 106: ./umk: No such file or directory
./install: line 107: ./umk: No such file or directory
Something went wrong.
Please notify developers.

I also tried an earlier (17138) which also failed. The build process created a broken theide.app file
which was mostly empty. The error message wasn't really helpful.

Linking...
/Users/imrelovasz/dev/External/build/upp_17138/umk (4475184 B) linked in (0:00.38)

OK. (1:40.80)
Something went wrong.
Please notify developers.

I also downloaded upp-posix-17136.tar.xz (the suggested nightly for 2023.12.25) but it contains
Windows executables, it's not a source distribution.

Thanks in advance,
M
