Hi,

First of all, sorry if i'm not very polite (English is not my native language)

I'm developing an application with the layout and everything is working great but I have an issue with the TreeCtrl (I'm adding elements to it) and it just truncates the output, I mean, the scrollbar never appears as you can see on the first image.

Also there is a strange behavior, after some minutes, if I just let the program running on background and then I go back to it, the scrollbar just appears (as you can see on the second image).
