> The SF CVS tree seems to be very old

I'm responisble for cvs. Unfortunately my connection to sf cvs is extremely slow so upp repository is not updated from some time. Second reason is I had to pass user password many times during committing what drove me crazy. I know it can be done automatically but I failed configuring it... Anyway I'm waiting sf to move to svn. It should be done soon...

PS: Of course having cvs up to date do not change anything if it comes to apply patches Mirek and Tom use their own versioning control system.
