Here is a short video demonstrating the basic capabilities of Bobcat, the terminal emulator (based on TerminalCtrl):

https://vimeo.com/999236026

What is demonstrated in the video, you may ask?

- 1 Running Doom in terminal emulator
- 2 Navigating the open terminals, using the Navigator.
- 3 Using the Finder to find text.
- 4 Navigating through the open terminals using I/r keys.

Best regards, Oblivion
