A compiler warning popped up on 32-bit MSBT22:

C:\upp-git\upp.src\uppsrc\Core\FileMapping.h (18): warning C4244: 'argument': conversion from 'Upp::int64' to 'size_t', possible loss of data

BTW: which condition flags should I use to include specific libraries only for 64-bit targets in TheIDE Package organizer? E.g. WIN64 or _WIN64 does not seem to work here.

Best regards,

Tom
