---

with clang  
when compiler flags set to -std=c++23 -Wno-logical-op-parentheses

we have multiple errors with messages like

Quote:

/home/lance/upp.src/uppsrc/Core/String.h (556): error: non-const lvalue reference to type 'String'  
cannot bind to a temporary of type 'String'

And the relevant source is

```
force_inline String& operator<<(String&& s, const char *x)
{
    s.Cat(x, strlen__(x));
    return s;
}
```

Now c++23 is rejecting code like these.
