coolman wrote on Thu, 19 September 2024 11:09Hi Mirek,

Would it be possible to clean up these annoying warnings?

```
uppsrc/RichText/ParaPaint.cpp (468): warning: unused variable 'pe' [-Wunused-variable]
uppsrc/ide/IconDes/Event.cpp (102): warning: unused variable 'c' [-Wunused-variable]
uppsrc/ide/IconDes/IconDes.cpp (130): warning: unused variable 'isz' [-Wunused-variable]
uppsrc/ide/IconDes/ImlFile.cpp (272): warning: unused function 'PutOctalString'
[-Wunused-function]
uppsrc/ide/SelectPkg.cpp:661:3: warning: misleading indentation; statement is not part of the
previous 'if' [-Wmisleading-indentation]
 661 |           for(int i = 0; i < dlg.list.GetCount(); i++)
      |           ^
uppsrc/ide/SelectPkg.cpp:658:2: note: previous statement is here
 658 |     if(n)
      |     ^
1 warning generated.
```

Thank you, Radek

Is this GCC?
