## Quote:

(maybe those specific assemblies have custom icons to display in package list?)

No.

## Quote:

Anyway, from backtraces it looks like indexer/libclang is running full steam. Can you try with assist++ off?

I have attached the logs. However, I noticed that it crashes less frequently when the indexer/assist++ is off.

Quote:

and perhaps separately try setting Image icon = Null;

Will try.

Best regards, Oblivion
