Hi,

Since Bobcat ise getting closer and closer to its first release, it sure needed an icon. So here it is, Bobcat now officially has an icon!

:)

Notice that there is another goodie in the background that will be published (with TerminalCtrl's next release). It is called TerminalTools package.

As it names suggest, it was made for testing TerminalCtrl, but now I decided to publish it as a terminal tools package. It is pretty light-weight, yet it can be used to build text user interfaces (TUI), or prettify your console apps.

Stay tuned.

Best regards, Oblivion
