Hi,

Bobcat Updated:

- Bobcat's Navigator is now using a dynamic layout.
- MacOS build errors fixed.
- Navigator items now display the status of the terminal on exit, using a simple blinking icon animation:
  - Question icon -> Terminal is asking for user input.
  - Exclamation icon -> Terminal command is failed and asking for user input.
  - Error icon -> Terminal command is failed. (non interactive)
  - Success icon -> Terminal command has successfully completed. (non-interactive)

Here's a gif:

Best regards,  
Oblivion
