Novo wrote on Mon, 16 December 2024 07:21: It looks like there are problems with icons on Mac. I checked this on MacOS 15.1 arm64.

This icon is actually loaded from web, as part of search engine initialisation. Most likely you have initialised the IDE in UHD mode, then switched to HD mode. The IDE loaded these icons for UHD.

Still something to fix (I guess we will need to store both), but I do not think it is critical for stable update.
