Novo wrote on Thu, 19 December 2024 06:25So far setting LargeIcon to 512x512 works for me.
I do not understand what all these icon32x32, icon64x64, icon128x128, icon256x256, and icon512x512 files for ...
They seem to be ignored by MacOS ...

Probably intended for Finder to display icon for app that is not running (so have not chance to call LargeIcon).

Anyway, I take it 512x512 works and will change the code accordingly.
