Subject: Arrows in Win11 scrollbar disappeared

Hi,

I found that there's been a change a couple of weeks ago:

"Core: IsWin11, CtrlLib: No arrows in Win11 scrollbar"

Why no arrows? At least Windows Explorer and Notepad have arrows on scrollbars in Win11, although they only appear when cursor is at least hovering on top of the scrollbar.

BTW: I would have commented on GitHub on the commit, but for some reason the Comments section seems to be frozen/unaccessible there at the moment.

Best regards,

Tom
