Hi,

Core/SSH package is updated.

There are some deprecated methods, a crucial fix for SFtpFileStream, and most importantly, the underlying libssh2 library is upgraded from v1.10 to v1.11.1. This is a major upgrade with many improvements and bug fixes to libssh2. See the changes file in the package for changes.

Also, there is a new example code in the SshBasics example set: Polymorphism.

Best regards,
Oblivion
