Tom1 wrote on Thu, 09 January 2025 10:38Hi,

I noticed that new Windows laptops have appeared on the market with ARM64 architecture processors (e.g. Qualcomm Snapdragon X Plus X1P-42-100). Is U++ ready for this?

Tom

No. But it will probably not be an issue. CLANG-MINGW seems to support these for a long time. And ARM is not a problem - we run on MacOS M1 and Rapsberry PI without issue. Also windows emulate x86.
