Thanks Mirek,

That was fast!

1. Now I can see it, while it's still a bit slow to find it. :)
2. Layout editor is much better, but at least LabelBox and StaticText could yet switch their text color.
3. Perfect! :)
4. For some reason, the window still opens filled white when in dark theme. Could it be because of the ArrayCtrl then?

Best regards,

Tom

EDIT: It's not the ArrayCtrl... I removed the code that attaches it to the window, but still the window opened white until it had time for paint.
