OK, please try this

```
CocoMenuBar::Item& CocoMenuBar::Item::Text(const char *text)
{
    DLOG("====");
    DDUMP(bar->just_check);
    String txt = text;
    if(bar->just_check) {
        if(txt != this->text)
            bar->is_same = false;
        DDUMP(bar->is_same);
        return *this;
    }
    this->text = txt;
    String h;
    DDUMP(text);
    while(*text) {
        if(*text == '&') {
            text++;
            if(*text == '&') {
                h.Cat('&');
                text++;
            }
        }
        else
            h.Cat(*text++);
    }
    DDUMP(h);
    DDUMP(~submenu);
    NSString *s = [NSString stringWithUTF8String:~h];
    nsitem.title = s;
    if(submenu)
        submenu->cocomenu.title = s;
    return *this;
}
```

Thank you!
