03:31Painter/Rasterizer.cpp:318:10: runtime error: left shift of negative value -160

- this is interestingly no more error in C++20 (and ubsan agrees)... (I am adding this note here as I expect you to retest after I am finished fixing).

I attached what I'm getting with my compiler.

Left shift is still there ...

Either your clang version does not know about it or you have not changed the build method to C++20... (When I did, it got fixed).

Mirek
