[not the highest priority].  
Upp-v17605.

Drawing like this produces attached image.

```
....:GLPaint(){  
    Size sz = GetSize();  
    GLDraw w;w.Init(sz);  
    w.DrawEllipse(sz,Green());  
    //w.DrawRect(sz,LtGray());  
}
```

Added:

for attached image: it was compiled for 32bit version(so this is not the highest priority).  
in 32bit ver - one drawing w.DrawRect(sz) is not drawn at all(neither with msvc/clang),  
but with msvc w.DrawRect(10,10,100,100,Red()) draws ok(with clang that is not drawn at all).

Compiling for 64bit - all works fine.
