Hello,

I've a tabctrl and in one of the pages there is a layout. In this last I've created a toolbar to attach several buttons with icon. The toolbar looks not so nice. In fact it remains gray while I was waiting to see it white after last chamaleon. Perhaps it is normal.

Perhaps I did a mistake with AddFrame, so I post the code that realize it in the layout:

```
class VegaTab4 : public WithVegaTab4Layout<ParentCtrl> {  
ToolBar toolbar;  
FontHeight edt;  
EditString eds;  
public:  
String filename;  
typedef VegaTab4 CLASSNAME;  
...  
}
```

and the constructor

```
VegaTab4::VegaTab4()  
{ int i;  
CtrlLayout(*this);  
SizePos();  
AddFrame(toolbar);  
toolbar.Set(THISBACK(MainBar));  
... // not important  
}
```
