Subject: Re: Why SetCtrl() places controls in first row of ArrayCtrl? Posted by Imonda on Thu, 07 Aug 2025 00:36:21 GMT

Hi Oblivion

Thank you for pointing out the space.

I think the setctrl() calls are causing the first row to be blank. and that leads to the crash eventually.

I am trying to see if i can avoid doing setctrl() after adding the row.

But i still need to use getctrl() to access the controls. Will try to implement this and see if that fixes the issues.

Thanks

Lmonda
