Subject: Re: libxlsxwriter compilation problem
Posted by Oblivion on Fri, 22 Aug 2025 15:56:02 GMT

Hello Luigi,
Quote:today i compiled on linux the same app that worked under Windows and I got this error

  /home/luigi/Documenti/upp/.config/u++/theide/UppHub/Xlnt/Xln t/Xlnt.cpp (4): In file included from   /home/luigi/Documenti/upp/.config/u++/theide/UppHub/Xlnt/Xln t/Xlnt.cpp:4:
  /home/luigi/Documenti/upp/.config/u++/theide/UppHub/Xlnt/Xln t/Xlnt.h (13): error: unknown type name 'Grid'
  /home/luigi/Documenti/upp/.config/u++/theide/UppHub/Xlnt/Xln t/Xlnt.cpp (20): error: unknown type name 'Grid'

I checked it and It works fine on my linux setups.

Probably the problem is installed version of Functions4U. Grid class is added to the package in Jan 26, 2024.
Did you update that to its latest version?

Best regards,
Oblivion
