Hello all,

Before working on an update of my first book: "Getting started with the U++ Framework", I was asked by some enthusiasts to have a hardcopy of the online Reference documentation.

And so I did: the book "U++ Reference Guide: core classes" is from now on available here:

<https://www.amazon.com/dp/B0FX9JMRF>

I will have to split the full documentation between core classes (now available) and non-core classes (WIP), because this one is already 450 pages

I make no money on this one, because it didn't take me a lot of work to make it.

If there is interest by the U++ administrators, I'm willing to give a free .PDF version to be published on this site under Documentation: Books. Just let me know what to send where.

Have a nice evening,

---
