Lance wrote on Wed, 11 May 2016 01:18Turns out it's even easier. The following code succeeded on my windows 8 system.

```
HDC hdc = CreateDC( "WINSPOOL", "Microsoft XPS Document Writer", NULL, NULL);
if(hdc) {
 One<PrintDraw> d = new PrintDraw(hdc, "My Printing Job Name");
 LOG("Printer Draw OK");
 d->DrawText(10,20,"Test",StdFont().Height(720),Black());
 d->EndPage();
 DeleteDC(hdc);
}
```

You should replace "Microsoft XPS..." with your actual printer name (who doesn't need to be the default printer.

HTH,

Lance
