How do I configure line numbers positioning in the CodeEditor package?
Currently it seems to be left aligned, i want it to be right aligned?

I have this basic code -

```
include <CtrlLib/CtrlLib.h>
#include <CodeEditor/CodeEditor.h>

using namespace Upp;
  /*
INITBLOCK {
    Ctrl::SetDarkThemeEnabled(false);
    Ctrl::SetSkin(ChStdSkin);
}
*/

class Notepad : public TopWindow {
    CodeEditor editor;

public:
    Notepad() {
        Title("Simple Notepad");
        Add(editor.SizePos());

        editor.LineNumbers(true);

    }
};

GUI_APP_MAIN
{
    Notepad().Run();
}
```

Also, i am unable to find documentation for the CodeEditor package.
