Tom1 wrote on Mon, 08 December 2025 23:50Hi,

Still in trouble with commenting out debugger. Any suggestions on how to do that cleanly and efficiently?

IDK, I guess the best option is to fix it :) I guess he is unhappy about CPU registers...

Another issue that surfaced is libclang which is missing too. How to build or is it available readily in some location?

<https://github.com/llvm/llvm-project/releases>

You install win arm64 and fetch libclang.dll from files...
