Subject: PromptYesNoOpt dialog

Hello,

```
#include <CtrlLib/CtrlLib.h>

using namespace Upp;

GUI_APP_MAIN
{ PromptYesNoOpt("Do you want to see me again?");
}
```

perhaps I have not understood how the Opt should work.
I would like that when "Do not show it again" is checked it should stop to appear.
Instead it continues to appear irrispective of my choose.

Thanks,
luigi
